Summary

Passionate software engineer with 5+ years of experience building web and mobile applications. Currently focusing on AI-driven solutions.

Work Experience

Senior Software Engineer - <u>Tech Innovations Inc.</u>

Jan 2023 - Jan 1970 | San Francisco, CA

Leading the development of the company's flagship product, a SaaS platform for business analytics. Implemented microservices architecture that improved system reliability by 40%. Mentored junior developers and conducted code reviews to ensure code quality. Collaborated with product and design teams to deliver features that increased user engagement by 25%.

Software Engineer - <u>Tech Innovations Inc.</u>

Mar 2021 - Jan 2023 | San Francisco, CA

Developed and maintained RESTful APIs using Node.js and Express. Built responsive front-end interfaces with React and TypeScript. Implemented automated testing that reduced bug reports by 30%. Participated in agile development processes including daily stand-ups and sprint planning.

Junior Developer - <u>StartUp Solutions</u>

Jun 2019 - Mar 2021 | Austin, TX

Assisted in the development of web applications using JavaScript and PHP. Implemented UI components following design specifications. Participated in code reviews and bug fixing processes.

Projects

AI-Powered Chatbot - Tech Innovations Inc.

Jan 2022 - Dec 2022

Developed a chatbot using Python and TensorFlow that provides customer support for e-commerce platforms. Integrated with various APIs to fetch product information and order status.

Personal Portfolio Website

Jan 2021 - Jun 2021

Created a personal portfolio website using React and Next.js to showcase projects and skills. Implemented responsive design principles to ensure compatibility across devices.

Open Source Contribution - Open Source Community

Jan 2020 - Dec 2020

Contributed to an open-source project on GitHub focused on improving accessibility features in web applications. Implemented keyboard navigation and screen reader support for various components.

Volunteering

Tech Mentor - Code For Good

Jun 2020 - Dec 2022

Mentored underrepresented youth in software development skills. Organized monthly workshops teaching web development basics. Helped develop curriculum for after-school coding programs reaching over 200 students annually.

Education

Master Of Science - MS - Computer Science - 3.9 GPA

Sep 2017 - May 2019 | Stanford University | Specialized in Machine Learning and Distributed Systems. Thesis on 'Optimizing Neural Networks for Edge Computing Applications'

Bachelor Of Science - BS - Computer Engineering - 3.7 GPA

Aug 2013 - May 2017 | University of Texas at Austin | Coursework included Data Structures, Algorithms, Computer Architecture, and Software Engineering

Skills

JavaScript, React, Node.js, TypeScript, Python, Machine Learning

Languages

English, Spanish
